Subject (9088036) Delfasco TO

Yesterday, we received a verbal approval from Pam Phillips, Acting DD, for initiating the work at Delfasco Forge. She approved up to \$200,000 for the ERRS portion of the response. The \$200,000 came from the Action Memo that has been in concurrence since Friday. Although, the anticipated immediate costs are much lower, well within the draft TO that was prepared, \$50,000.

I'm assuming that this email will suffice for the documentation of the verbal approval. If not, please let me know.

The Action Memo is drafted but I have yet to hear a comment back from the busy people on the concurrence list. I've attached the draft AM for your information.

I do not recall discussing the completion date with JoAnn. I would suggest an 11 month completion date, i.e. July '09. Unless there is an earlier date that makes sense do to contract issues such as end of year, etc.

Again, please let me know if there is more documentation for the Verbal approval or for the TO itself. We are looking forward to quickly getting ERRS working.

Thanks
